

CONTENTS

Foreword	xv
Preface	xvii
Chapter 1 Introduction/Key Drivers in the Missile Design and System Engineering Process	1
1.1 Introduction	1
1.2 Missile Characteristics Comparison	2
1.3 Conceptual Design and System Engineering Process	8
1.4 System-of-Systems Considerations	13
1.5 Examples of State-of-the-Art Missiles	16
1.6 Aerodynamic Configuration Sizing and System Engineering Parameters	19
1.7 Example of Alternatives in Establishing Mission Requirements	21
1.8 Use of a Baseline Missile	26
1.9 Summary	31
1.10 Problem Review	32
Chapter 2 Aerodynamic Considerations in the Missile Design and System Engineering Process	33
2.1 Introduction	33
2.2 Missile Diameter Tradeoff	34
2.3 Nose Fineness and Geometry Tradeoffs	43
2.4 Body Drag Prediction	45
2.5 Boattail	49
2.6 Body Normal Force Prediction	51
2.7 Lifting Body Versus Axisymmetric Body	52
2.8 Forces, Moments, and Axes Sign Convention	55
2.9 Static Stability	56
2.10 Body Aerodynamic Center Prediction	58
2.11 Flare Stabilizer	59
2.12 Wings Versus No Wings	61

2.13	Planar Aerodynamic Surface Geometry Parameters	64
2.14	Normal Force Prediction for Surfaces (e.g., Wing, Tail, Canard)	65
2.15	Aerodynamic Center Prediction for Planar Surfaces (e.g., Wing, Tail, Canard)	70
2.16	Hinge Moment Prediction	71
2.17	Planar Surface (e.g., Wing, Tail, Canard) Drag Prediction	73
2.18	Surface Planform Geometry and Integration Alternatives	77
2.19	Flight Control Alternatives	82
2.20	Maneuver Law Alternatives	102
2.21	Roll Angle and Control Surface Sign Convention	108
2.22	Flight Roll Orientation	109
2.23	Trim and Static Stability Margin	110
2.24	Tail Area Sizing	113
2.25	Stability and Control Conceptual Design Criteria	116
2.26	Aerodynamic Configuration Buildup	117
2.27	Summary	119
2.28	Problem Review	119
Chapter 3	Propulsion Considerations in the Missile Design and System Engineering Process	123
3.1	Introduction	123
3.2	Propulsion Alternatives Assessment	124
3.3	Turbine Propulsion Alternatives	129
3.4	Turbojet Flow Path, Components, and Nomenclature	131
3.5	Turbojet Thrust Prediction	145
3.6	Turbojet Specific Impulse Prediction	149
3.7	Subsonic Turbojet Propulsion Efficiency	155
3.8	Ramjet Propulsion Alternatives	158
3.9	Ramjet Flow Path, Components, and Nomenclature	160
3.10	Ramjet Combustion Temperature	161
3.11	Ramjet Specific Impulse Prediction	162
3.12	Ramjet Thrust Prediction	164
3.13	Ramjet Combustor Design Considerations	168
3.14	Ramjet Booster Integration	174
3.15	Ramjet Inlet Options	177
3.16	Supersonic Inlet/Airframe Integration	180
3.17	Fuel Alternatives	192
3.18	Rocket Motor Performance Prediction	194
3.19	Rocket Motor Sizing Process	199
3.20	Solid Propellant Grain Alternatives	204
3.21	Solid Propellant Rocket Thrust Magnitude Control	206

3.22	Solid Propellant Alternatives	210
3.23	Solid Propellant Aging	213
3.24	Rocket Motor Case Material Alternatives	216
3.25	Rocket Nozzle Material Alternatives	218
3.26	Ducted Rocket Design Considerations	221
3.27	Summary	223
3.28	Problem Review	223
Chapter 4	Weight Considerations in the Missile Design and System Engineering Process	227
4.1	Introduction	227
4.2	Benefits of a Light Weight Missile	228
4.3	Subsystem Weight Sensitivity to Flight Performance	229
4.4	Missile Weight Prediction	230
4.5	Center-of-Gravity and Moment-of-Inertia Prediction	235
4.6	Missile Structure Factor of Safety	237
4.7	Missile Airframe Structure Manufacturing Processes	239
4.8	Missile Airframe Material Alternatives	251
4.9	Missile Structure/Insulation Trades	258
4.10	High Temperature Insulation Materials	261
4.11	Missile Aerodynamic Heating/Thermal Response Prediction	264
4.12	Localized Aerodynamic Heating and Thermal Stress	283
4.13	Missile Structure Design	287
4.14	Seeker Dome	305
4.15	Missile Power Supply and Flight Control Actuators	311
4.16	Summary	315
4.17	Problem Review	316
Chapter 5	Flight Performance Considerations in Missile Design and System Engineering	319
5.1	Introduction	319
5.2	Missile Flight Performance Envelope	320
5.3	Equations of Motion Modeling	323
5.4	Driving Parameters for Missile Flight Performance	326
5.5	Cruise Flight Performance	329
5.6	Steady-State Flight	331
5.7	Flight Trajectory Shaping for Maximum Range	332
5.8	Turn Performance	333
5.9	Coast Flight Performance	344
5.10	Ballistic Flight Performance	345

5.11	Boost Flight Performance	348
5.12	Divert Flight Performance	349
5.13	Intercept Lead Angle and Velocity	351
5.14	Comparison of Missile Design with Performance Requirements	352
5.15	Summary	352
5.16	Problem Review	353
Chapter 6	Measures of Merit and Launch Platform Integration/System Engineering	355
6.1	Introduction	355
6.2	Robustness	357
6.3	Warhead Lethality	396
6.4	Miss Distance	435
6.5	Carriage and Launch Observables	465
6.6	Missile Survivability and Safety	469
6.7	Reliability	503
6.8	Cost	506
6.9	Launch Platform Integration	523
6.10	Summary	578
6.11	Problem Review	579
Chapter 7	Sizing Examples and Sizing Tools	583
7.1	Introduction	583
7.2	Rocket Baseline Missile Standoff Range Requirement	584
7.3	Wing Sizing Requirement and Turn Performance	603
7.4	Multi-Parameter Harmonization	607
7.5	Maximum Range Trajectory	611
7.6	Ramjet Missile Range Robustness	614
7.7	Ramjet Propulsion/Fuel Alternatives	628
7.8	Velocity Control	630
7.9	Turbojet Baseline Thrust Prediction	632
7.10	Turbojet Baseline Specific Impulse Prediction	643
7.11	Turbojet Baseline Missile Low Altitude Range Prediction	646
7.12	Turbojet Baseline Missile Maximum Range Prediction	652
7.13	Turbojet Baseline Engine Rotational Speed	655
7.14	Examples of Computer-Aided Conceptual Design Sizing Tools	656
7.15	Soda Straw Rocket Design, Build, and Fly	664
7.16	Soda Straw Rocket Range Pareto and Uncertainty Analysis	674
7.17	House of Quality	679
7.18	Design of Experiment	684

7.19	Summary	695
7.20	Problem Review	696
Chapter 8	Development Process	699
8.1	Introduction	699
8.2	Missile Technology and System Development Process	699
8.3	New Missile Program Planning and Development	714
8.4	Example of Missile Technology Development	721
8.5	Examples of State-of-the-Art Advancement	725
8.6	New Technologies for Missiles	727
8.7	Summary	729
8.8	Problem Review	730
Chapter 9	Summary and Lessons Learned	731
9.1	Introduction	731
9.2	Conduct Unbiased and Creative System-of-Systems Design, with Rapid Evaluation and Iteration	731
9.3	Exploit Diverse Skills	731
9.4	Quickly Switch Focus from the Big Picture to a Detail Picture to . . .	733
9.5	Utilize Creative Skills	734
9.6	Utilize the Skills of the Entire Organization	735
9.7	Balance the Tradeoff of Importance Versus Priority	736
9.8	Identify, Quantify, and Balance the Measures of Merit, within Cost Constraints	737
9.9	Start with a Good Baseline Design	738
9.10	Evaluate Alternative Prediction Methods and Compare with Data, for Accuracy and Precision	738
9.11	Confirm Accuracy of Computer Input Data and Modeling	740
9.12	Conduct Balanced, Unbiased Tradeoffs	741
9.13	Include System Integration in Missile Conceptual Design and System Engineering	742
9.14	Evaluate Many Alternatives	743
9.15	Quickly Search a Broad Design Solution Space (Global Optimization Versus Local Optimization)	744
9.16	Evaluate and Refine as Often as Possible	744
9.17	Apply OODA Loop Process for Faster and Higher Confidence Design Convergence	744
9.18	Provide Balanced Emphasis of Analytical Versus Experimental	746

9.19	Use a Design, Build, and Fly Process, for Feedback Leading to Broader Knowledge and Understanding	747
9.20	Consider Potential Consequences (Good and Bad) of Decisions	748
9.21	Keep Track of Assumptions and Develop Real-Time Documentation	749
9.22	Develop Good Documentation	750
9.23	Rapidly Evaluate Alternatives and Iterate the Design	752
9.24	Missile Conceptual Design and System Engineering Configuration Sizing Guidelines	752
9.25	Wrap-Up	755
Appendix A	Homework Problems/Classroom Exercises	757
Appendix B	Example of Request for Proposal	769
Appendix C	Nomenclature	779
Appendix D	Acronyms/Abbreviations	789
Appendix E	Conversion Factors	799
Appendix F	Example Syllabus	801
Appendix G	CEU Credit Quizzes	805
Appendix H	Design Case Studies	829
Appendix I	Summary of Tactical Missile Design Spreadsheet	831
Appendix J	Soda Straw Rocket Science	837
	References	843
	Bibliography	845
	Index	849
	Supporting Materials	881
